2 of 2 review helpful Board recertification By Daniel R Conway This was an easy inexpensive review for the ABS

recertification exam The format of the questions is similar to those on the exam Having the critiques on the same page as the questions makes it easy to read I also went through SESAP The SESAP format was more cumbersome The questions and critiques are separated and the question format was more complex The new edition of Schwartz s Principles of Surgery has become the text of choice for all surgeons and residents And now a self assessment and board review book has been developed to accompany the field s new classic Featuring more than 1400 questions complete with answers and rationales this is not a review of Schwartz s Principles of Surgery but a comprehensive review supported by the content from the main text About the Author F Charles Brunicardi MD is affiliated with the Department of Surgery Baylor College of Medicine Dana K Anderson MD is affiliated with the Department of Surgery University of Pittsburgh School of Medicine Timothy R
