From Academic Press : Plasma Diagnostics, Volume 2: Surface Analysis and Interactions (Plasma-Materials Interactions)

international journal of molecular sciences an international peer reviewed open access journal nuclear fusion is the acknowledged world leading journal specializing in fusion the journal covers all aspects of research theoretical and practical relevant to Plasma Diagnostics, Volume 2: Surface Analysis and Interactions (Plasma-Materials Interactions):

Plasmas and their interaction with materials have become subjects of major interest because of their importance in modern forefront technologies such as microelectronics fusion energy and space Plasmas are used in microelectronics to process semiconductors etching of patterns for microcircuits plasma induced deposition of thin films etc plasmas produce deleterious erosion effects on surfaces of materials used for fusion devices and spaceships exposed to the low
