From CRC Press : Management and Prevention of Thrombosis in Primary Care deep venous thrombosis dvt is a manifestation of venous thromboembolism vte although most dvt is occult and resolves spontaneously without complication death background the efficacy and safety of vena caval filters in the prevention of pulmonary embolism in patients with proximal deep vein thrombosis are still a matter of Management and Prevention of Thrombosis in Primary Care:

This book is a comprehensive practical guide to the understanding and management of thromboembolytic disease. Management of thrombosis formerly the domain of the cardiologist or haematologist has become an increasingly significant issue in primary care and general practice particularly as the range of therapies available has increased. With a uniform structure taking the reader through a background pathophysiology chapter, management strategies, and a detailed and very up to date account of venous and arterial thrombosis. The main strength of the book is the clinical focus on a number of clinical situations. Cardiology News. A very detailed index including the abbreviations for the clinica.
