1 of 1 review helpful Best introductory hematology By Chiu Yen Ling I found hematology very difficult when I was learning it in 3rd year But after reading this book in the library I started to know how to learn this subject well This is truly a very concise and understandable good textbook Well written and easy to use the text concentrates on what readers need to know the crucial information on diseases of the blood and blood forming organs The 3rd Edition includes more specifics on treatment of blood disorders expanded and reorganized coagulation chapters and information on growth factors immunobiology and oncogenes
