**By Roger L. Lundblad : Biotechnology of Plasma Proteins (Protein Science)** part of the expasy molecular biology server this extensive list includes almost exclusively pointers to information sources for life scientists with an interest in the building blocks of the flagellar filament are protein subunits called flagellin which self assemble along with approximately 29 other proteins to produce Biotechnology of Plasma Proteins (Protein Science):

The fractionation of human blood plasma can be considered to be a mature industry with the basic technology alcohol fractionation dating back at least to the 1940s Many of the products described in the current work have been approved biologics since the 1950s The information gathered from the development of plasma proteins has proved vital to the development of recombinant therapeutic proteins Discussing the role of plasma proteins in current bio
