By Alan H. Rebar, Peter S. MacWilliams, Bernard Feldman, Fred Metzger, Roy Pollock, John Roche : A Guide to Hematology in Dogs and Cats guide to congenital and heritable disorders in dogs includes genetic predisposition to diseases special thanks to w jean dodds dvm for researching and webmd explains hypoxia a dangerous condition that happens when your body doesnt get enough oxygen A Guide to Hematology in Dogs and Cats:

1 of 1 review helpful A Guide to Hematology in Dogs and Cats By Peter Lording As teacher of haematology to veterinary students I find this book a valuable resource It contains superb photographs and sufficient accompanying text to explain the key features of red blood cells white blood cells and platelets I cannot think of any dislikes about this book and I would recommend it as a valuable addition to a veterinary student A Guide to Hematology is a valuable hands on laboratory manual for the practitioner and technician It provides step by step guidelines for the collection and processing of blood samples and interpretation of the hemogram It also serves as a guide to patient assessment and treatment planning for all common hematological disorders and diseases in dogs and cats Veterinarians are able to test comprehension of the material through case studies with self test questions T About the Author Dr Alan H Rebar is the Dean at Purdue University in the School of Veterinary Medicine Dr Peter S MacWilliams is Professor of Clinical Pathology at the University of Wisconsin School of Veterinary Medicine His principal research interests
