and information about the company Jak-Stat Signaling : From Basics to Disease:

JAK tyrosine kinases and STAT transcription factors constitute a signaling pathway which is activated by cytokines. By activating gene transcription it regulates essential biological responses to environmental cues. The Jak Stat pathway is involved in the regulation of cell development, differentiation, proliferation, and apoptosis. Improper function may contribute to hematopoietic malignancies and cancer. This book provides comprehensive insights into the latest basic and clinical developments on the involvement of the Jak Stat pathway in the regulation of cell development, differentiation, proliferation, and apoptosis.
