From Springer : Rotary Blood Pumps: New Developments and Current Applications overview of smas and smms including their advantages and limitations o the major challenges and compendium of all course descriptions for Rotary Blood Pumps: New Developments and Current Applications:

Rotary blood pumps increasingly are being used in open heart surgery and in assisted circulation for patients with heart disease. These rotary devices include vortex centrifugal and axial pumps which can be utilized in conditions where the use of conventional pulsatile pumps would entail problems of cost and size. Rapid progress is now being made in developing new devices for controlling blood flow within the heart and great vessels as well as extracorporeally for use.
